- React Redux/Redux Toolkit
- SASS/LESS
- Gulp/Vite
- Linux (CentOS/Kali)
- OOP/SOLID principle
- Java
- RESTful APIs/JSON

## Projects:

### 1 ToDoList:

**Preview:** <https://todolist-d4337.web.app>

**GitHub:** <https://github.com/meyirman-is-creator/ToDoList>

**Description:** The app's logic focuses on task management through a system where users can add, manage, and delete tasks. The stack includes React, utilizing Hooks like useState, useEffect, useContext, and useMemo for efficient state management, and Tailwind CSS for styling, ensuring a user-friendly and optimized performance.

### 2 PolyLingua:

**Preview:** <https://polylingua-94f50.web.app>

**GitHub:** <https://github.com/meyirman-is-creator/PolyLingua>

**Description:** PolyLingua is a video translation service aimed at enhancing cultural connections by offering easy translation of videos into various languages. It uses HTML, CSS, Vanilla JavaScript, and Firebase, including Authentication, Realtime Database, and Hosting, ensuring a secure and dynamic user experience. The design is responsive, utilizing Bootstrap 5, catering to all devices.

### 3 MediumAsMedia:

**Preview:** <https://mediumasmedia.web.app/index.html>

**GitHub:** <https://github.com/meyirman-is-creator/media-as-medium>

**Description:** "Medium as Media" is a dynamic news portal featuring categories like Sports, Business, Technology, and Music. Developed with HTML, CSS for a responsive design, and JavaScript for category-based navigation

### 4 JumysTap:

**Preview:** <https://jumystap-cd916.web.app>

**GitHub:** <https://jumystap-cd916.web.app>

**Description:** In the JumysTap project, I applied HTML and CSS to develop a responsive web application, focusing on a clean and user-friendly design. Hosted on Firebase Hosting for robust performance and reliability
